## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 17 October 2005 has been entered.

Claims 37-39, 41-57, and 60-65 have been examined on the merits. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

### ***Double Patenting***

Claims 37-39, 41-57, and 60-65 (as amended) stand rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 21-26 of U.S. Patent No. 5,504,117 and over claims 7-20 of U.S. Patent No. 5,693,676 for the reasons set forth in the previous Office action (with respect to the instantly claimed method of ameliorating pain in a human associated with the selected anal disorders recited in the amended claims - as discussed below).

Although the conflicting claims are not identical, they are not patentably distinct from each other because the instantly claimed method and the claimed methods of US '117 and US '676 are each drawn to a method of ameliorating (controlling) pain associated with an anal disease/disorder - e.g., an anal fissure, anal ulcer, hemorrhoidal disease, and/or levator spasm via administering a composition comprising an effective amount of a nitric oxide donor (such as nitroglycerin or L-arginine) to the affected anal area/anal canal of a subject in need thereof. In addition, it would clearly have been obvious to one of ordinary skill in the art at the time the claimed invention was made to further include an art-recognized pain-relief agent such as a corticosteroid and/or local anesthetic within such a topical therapeutic composition for the well known benefits such an agent provides in terms of aiding in effectively providing pain relief to such a subject. Further, the instant claims encompass or are encompassed by the claimed methods of US '117 and '676.

Applicants' previous response (submitted 11 April 2005) to the above obviousness-type double patenting rejections is that they be held in abeyance until some claims are deemed to be in condition for allowance at which time they intend to submit a suitable terminal disclaimer obviating these rejections. Accordingly, the ODP rejections stand until a suitable terminal disclaimer has actually been submitted.

Art Unit: 1655

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
